What is the weekly limit?

- Each library member has a weekly limit, set by the library, which governs book downloads. In the upper right corner, there is a counter which says how many books you have used, and how many are remaining. Example: 0/3 means the limit is 3 book loans per week, and you have used 0.
Unused book loans roll over each week for a four week period, a week being defined as a Monday to Sunday period of seven days, beginning at 12:01AM Monday, New York time, and going to midnight on Sunday. At the end of the fourth week from the time you first logged in, unused loans are cleaned out of your account, except for your original weekly allotment. The rolling over process then starts all over again, as a new four week cycle has begun. Your subscribing library decides the amount of book loans that users will have in their weekly allotment.
